

WIRELESS REMOTE DIMMER & SWITCH

BATTERY POWERED

OVERVIEW

The **BL2 SYSTEMS** remote dimming and on/off wall stations are battery powered devices that provide manual operation of wirelessly controlled lighting. These attractive wall stations greatly reduce total installation time and wireless pairing fuss. Requiring just a few seconds per device, **BL2 SYSTEMS** wireless sensors can be linked to one or more wireless load controllers (such as the **BL2-851** wireless wall switch, or a **BL2-950** series wireless power pack). Additionally, these devices can be configured to work together with other wireless or wired wall stations to provide dimming and switching control from multiple locations.

APPLICATIONS

Adding a wireless remote wall switch to a room controlled by a wireless power pack (BL2-950) and a wireless sensor (e.g. BL2-201-B) enables code compliant vacancy (manual on) operation. When linked with a wireless dimming power pack (BL2-950-D2), a remote wireless dimmer is perfect for providing user control of 0-10V dimmable lighting. Additional remote dimmer switches can be linked enabling user control from multiple locations. Linking a remote wireless switch to a wireless wall switch load controller (BL2-851) enables 3-way user control as well.

- Classrooms
- Open Areas
- Conference Rooms
- Hallways
- Small Offices
- Copy Rooms
- Private Restrooms
- Break Rooms

OPERATION NOTES

- Wireless remote switches and dimmers only transmit when a button is being pressed.
- The unit's blue LED will light only when a button is pressed.
- The dim up and dim down buttons may be held down to increase dimming rate.
- There are always 20 equal steps of dim level (voltage) adjustment from high trim to low trim (or reverse) when using a BL2-854-B wireless remote dimmer.

INSTALLATION

- Designed to mount in 1-gang wall box with 3.28" hole spacing.
- Units can also share multiple gang wall boxes with other devices.

BATTERY INFORMATION

- The switch/dimmer runs on one CR123(A) Lithium Battery (included).
- Install battery prior to mounting. Polarity is indicated on the battery compartment door.
- If the unit's battery life reaches 10%, the LED no longer light up after every button press.
- Replacement batteries are available at most retailers or home centers where batteries are sold or from BL2 SYSTEMS.

WIRELESS PAIRING

Pairing a remote dimmer/switch with a wireless wall switch load controller or power pack load controller is quickly done via the following procedure:

1. Enter pairing mode by holding down the wireless load controller's button for 3 seconds until the LED starts alternating white then blue.
2. At the battery powered remote dimmer/switch, hold down the ON button for 3 seconds until the LED starts alternating white then blue. Releasing will pair the device with the controller in pairing mode (see note 1 below). The lights will toggle once as confirmation.
3. If additional remote dimmers or switches need to be linked, repeat step 2.
4. When all devices have been paired, close pairing mode on the wireless load controller by pressing the button 1 time. Pairing will also be automatically closed after 15 minutes of no new devices being linked.

Note 1: When in pairing mode, the alternating LED colors on the wireless load controller will periodically pause and blink out the total number of paired devices. There will be no blinks during the pause until the first device is linked.
